

# Supervised Learning

Input Data (Features)

Label

ML Model  
(Random Forest)

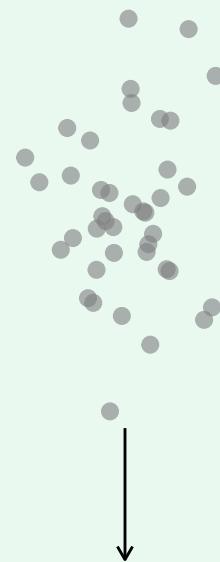

Predicted Labels

Goal: Predict labels for new data  
Example: Classify tumors

# Unsupervised Learning

Input Data (Unlabeled)

ML Model  
(PCA / K-Means)

Output Clusters

Goal: Find hidden structure  
Example: Identify cell types

# Reinforcement Learning

Agent  
(Decision Maker)

Reward + State

Action

Environment  
(Drug Discovery)

Goal: Maximize reward  
Example: Optimize dosage
